DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-17 and 20-27 are rejected under 35 U.S.C. 102(a) as being anticipated by Wang et al (US 6,330,170).

Claims 1-17 and 20-27; Wang et al disclose a converter circuit (figures 5, 15a, 15b), comprising: an AC-to-DC converter (56, 66), comprising a plurality of first power devices (S1-S4); a resonant DC link (66), comprising at least one power transistor (Sc); a DC-to-AC converter (58), comprising a plurality of second power devices (S5-S8); and DC link lines coupling the AC-to-DC converter, the resonant link and the DC-to-AC converter, wherein the power transistor (Sc) is connected between the DC link lines; and the resonant DC link is operable to clamp an operating voltage of the converter (e.g. abstract; Col. 6 lines 18 and 21; Col. 7 line 14).

Allowable Subject Matter

4. Claims 18 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: prior art fails to disclose or suggest, in combination with the claim limitations of claims 1, 15 and 16, wherein the resonant DC link comprises: a first capacitor in series with the power transistor; a resonant capacitor, an inductance coupled in parallel with the power transistor and the first capacitor, wherein the inductance forms a resonant circuit with the resonant capacitor; and a second capacitor coupled in series with the resonant circuit.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
